ENGINEERING CAREER FAIR
SPONSORED BY The College of Engineering and The Engineers’ Council

McKIMMON CENTER
OCTOBER 1 AND 2
9:30 AM – 4 PM

FALL 2013
students.engr.ncsu.edu/careerfair
From the Dean of Engineering

WELCOME TO THE FALL 2013 Engineering Career Fair at North Carolina State University. The College of Engineering is honored that so many outstanding employers are recruiting at this event. The breadth and depth of our programs and the more than 9,400 top students enrolled in engineering and computer science means NC State offers an excellent venue for employers in a variety of fields to connect with outstanding job candidates.

Our Engineering Career Fair began in 1998 and has become one of the largest career fairs of its kind in the nation. And since it is an open event, we have students from other colleges and universities traveling from across the country to attend. We are proud to host an event that plays such a pivotal role boosting the state and national economy.

Your support for our programs was reflected in 2010 when the College of Engineering was ranked 15th among the nation’s engineering schools by recruiters in a study published in the Wall Street Journal. This ranking reflects the high quality of graduates from our engineering and computer science programs and underscores why our career fair keeps attracting so many top employers.

The students and staff who run the career fair have worked hard to make sure this event exceeds your expectations. I hope you enjoy your experience at NC State University.

Louis A. Martin-Vega, Ph.D., P.E.
Dean, College of Engineering
North Carolina State University
Employer Booths

Room 1

Interviews

Recruiters Only
2013  AT A GLANCE
The College of Engineering

STUDENTS
- More than 9,000 students
- 18 bachelor’s, 21 master’s, 13 doctoral degree programs
- 60 percent of incoming freshmen in the top 10 percent of their high school graduating class

RESEARCH
- $160 million in research expenditures in 2012-13
- More than 2,800 graduate students
- Lead institution for two NSF Engineering Research Centers
- More than 20 centers, institutes and labs

FACULTY AND STAFF
- 13 members of the National Academy of Engineering
- 2 National Medals of Technology and Innovation
- 2 Directors of NSF Engineering Research Centers
- Lead Scientist for Department of Energy CASL
- 1 Emmy Award for plasma display technology
- 1 US Army Commander’s Award for life-saving military technology
- 1 Inventors Hall of Fame member
- 1 Electronic Design Hall of Fame member
- 3 Presidential Early Career Awards for Scientists and Engineers
- 4 Presidential Awards for Excellence in Science, Mathematics and Engineering Mentoring
- 55 NSF Career Awards since 2000

RANKINGS
- 15th in recruiter rankings featured in the Wall Street Journal
- 17th among public engineering schools whose highest degree is a doctorate in US News & World Report undergraduate rankings
- 16th among public engineering schools in US News & World Report graduate rankings
- 7th among online graduate engineering programs by US News & World Report
- 1st among online graduate engineering programs for veterans and active duty military personnel by US News & World Report
- 27th worldwide rank in the Academic Ranking of World Universities–Engineering Rankings
- 2nd among non-HBCUs in BS degrees awarded to African Americans
- 7th in number of tenured and tenure-track faculty
- 8th in BS degrees awarded
- 9th among all engineering schools in graduate enrollment
- 10th in undergraduate enrollment
- 14th in research expenditures

ACADEMIC DEPARTMENTS
- Biomedical Engineering
- Chemical and Biomolecular Engineering
- Civil, Construction, and Environmental Engineering
- Computer Science
- Electrical and Computer Engineering
- Industrial and Systems Engineering
- Materials Science and Engineering
- Mechanical and Aerospace Engineering
- Nuclear Engineering

ALUMNI
- 53,143 total living alumni
- 54 percent live in North Carolina
- Top 5 alumni metro areas outside NC: Washington, DC; Atlanta, Ga.; Bay Area, Calif.; Greenville/ Spartanburg, SC; Norfolk, Va.

ENGINEERING PROGRAMS
IN OTHER COLLEGES
- Biological and Agricultural Engineering
- Forest Biomaterials
- Textile Engineering

CENTENNIAL CAMPUS
- More than two-thirds of the College has moved to the state-of-the-art campus
- Engineering Buildings I, II and III are completed and occupied
- Engineering Buildings IV and V are in the planning stages
## Fall Engineering Career Fair

Analog Devices

Analog Devices, Inc. (NYSE: ADI) defines innovation and excellence in signal processing. ADI’s analog, mixed-signal, and digital signal processing (DSP) integrated circuits (IC) play a fundamental role in converting, conditioning, and processing real-world phenomena such as light, sound, temperature, motion, and pressure into electrical signals to be used in a wide array of electronic equipment. But that doesn’t begin to capture the essence of what Analog Devices does for our customers, and ultimately for the end user.

Anheuser-Busch, Inc.

Based in St. Louis, Anheuser-Busch is the leading American brewer, holding a 48.5 percent share of U.S. beer sales. The company brews the world’s largest-selling beers, Budweiser and Bud Light. Anheuser-Busch also owns a 50 percent share in Grupo Modelo, Mexico’s leading brewer. Anheuser-Busch ranked No. 1 among beverage companies in FORTUNE Magazine’s Most Admired U.S. and Global Companies lists in 2008. Anheuser-Busch is a major manufacturer of aluminum cans and one of the world’s largest recyclers of aluminum cans. The company is a wholly-owned subsidiary of Anheuser-Busch InBev, the leading global brewer, and continues to operate under the Anheuser-Busch name and logo. As the leading global brewer, AB InBev is committed to finding innovative ways to continually improve.

www.anheuser-busch.com

Applied Research Associates, Inc. is an employee-owned international research and engineering company recognized for providing technically superior solutions to complex and challenging problems in the physical sciences. ARA offices throughout the United States and Canada provide a broad range of technical expertise in defense technologies, civil technologies, computer software and simulation, systems analysis, environmental technologies, and testing and measurement. The corporation also provides sophisticated technical products for environmental site characterization, pavement analysis, and robotics. The Southeast Division (SED), established in Raleigh, North Carolina, in 1982, has since expanded into Suffolk, Virginia and Santa Barbara, California.

I-Cubed

Established in 1984, Integrated Industrial Information (I-Cubed) is a privately held technology company with an engineering heritage specializing in integration software at the enterprise level. I-Cubed began as a NCSU graduate student’s senior project with the development of CAD-Pack, software that saved valuable mainframe time for production of work. Throughout the early ’90s and into 2000, I-Cubed began developing technology that enabled specific Computer Aided Design (CAD) tools to work with unassociated Product Data Management systems. During that time we also developed Digital Rights Management software that caught the attention of Adobe.

http://www.i-cubed.com
**iAutomation**

iAutomation is a high tech automation distributor with innovative hardware and software solutions for our clients’ unique application requirements. With our experience in machine and motion control components coupled with our industry leading suppliers we provide our clients a valuable resource for their automation product needs.

A key part of our business is the Machine Control System Engineering group. We provide complete turn-key machine control solutions using components that we distribute. Engineering responsibilities include project engineering, electrical design, software design, machine commissioning and long term support. There are 30+ engineers in the company. We service clients from South Carolina to Maine.

---

**IBM Corporation**

International Business Machines Corporation is the world’s largest information technology company. The solutions and services we deliver to our clients span all major industries, including financial services, healthcare, government, automotive, telecommunications and education. It is the breadth of our portfolio -- across hardware, software, services, consulting, research, financing and technology -- that uniquely separates IBM from other companies.

IBM’s Smarter Planet initiative recognizes that the world is becoming increasingly instrumented, interconnected, and intelligent. Sensors are embedded in cars, appliances, cameras, roads, pipelines, and even medicine devices and livestock. Smart systems are transforming energy grids, supply chains, health care, and more.

---

**Industrial Extension Service**

IES is the outreach function of NC State University’s College of Engineering. IES provides engineering and technical expertise to make North Carolina business more productive and profitable. To do this IES uses lean manufacturing, quality initiatives such as Lean Six Sigma and ISO, sustainability offerings and programs in health, safety and environmental compliance.

IES serves as the state agency for the North Carolina Awards for Excellence, which is based on the Malcolm Baldrige criteria. In February of 2010, Governor Beverly Perdue created the Governor’s Award for Performance Excellence in Healthcare of which IES will provide assessment, training and recognition to hospitals interested in continuous improvement.

Quality, service and innovations make the MANN+HUMMEL Group a distinguished development partner and original equipment supplier to the international automotive and mechanical engineering industries.

With a clear vision of "Leadership in Filtration" around 14,575 employees across more than 50 sites on all continents have generated a total sales revenue of about EUR 2.6 billion in 2012.

http://www.mann-hummel.com
MathWorks

MathWorks is the leading developer of mathematical computing software. Engineers and scientists worldwide rely on its products to accelerate the pace of discovery, innovation, and development.

MATLAB®, the language of technical computing, is a programming environment for algorithm development, data analysis, visualization, and numeric computation. Simulink® is a graphical environment for simulation and Model-Based Design of multidomain dynamic and embedded systems. The company produces nearly 100 additional products for specialized tasks such as data analysis and image processing.

MaxPoint

MaxPoint Interactive’s retail advertising platform drives in-store traffic for retailers, brands, and multi-location business owners. The company’s Digital Zip® technology delivers the most effective and scalable neighborhood-level online campaigns. MaxPoint can pinpoint qualified customers interested in purchasing a product with more precision than using traditional zip codes, ultimately offering accurate neighborhood-level targeting with national reach and local results. Founded in 2007, MaxPoint has offices in New York, Chicago, Los Angeles, Cincinnati, Bentonville, Austin, and Raleigh-Durham.

McKim & Creed

Technically, McKim & Creed provides comprehensive engineering, surveying/mapping, and planning services. But we see our work a little differently. We are a community of nearly 400 people helping people make life just a little better. For 35 years, we have provided solutions for clean water, safe communities, and sustainable resources. You’re creative and enthusiastic - not to mention talented. Basically, you have a lot to offer an employer. At McKim & Creed, we have a lot to offer you. Our vision is to be a world class consultancy of people helping people define and achieve their goals and dreams.

Mentor Graphics

Mentor Graphics is a leader in electronic design automation. We enable companies to develop better electronic products faster and more cost-effectively. Our innovative products and solutions help engineers conquer design challenges in the increasingly complex worlds of board and chip design.

We’re results-oriented. Because this is a fast-paced industry, we challenge our employees to set goals, accept responsibility and solve problems. And we reward people for taking on these challenges. We’re also human. MGC maintains a close-knit, roll-up-your-sleeves atmosphere, with programs that encourage our employees to keep learning, take care of themselves and their families, enjoy a bit of the good life, and be actively involved in the communities where we live and work.
Microsoft

Microsoft is the worldwide leader in software, services and solutions that help people and businesses realize their full potential. We’re motivated and inspired every day by how our customers use our software to find creative solutions to business problems, develop breakthrough ideas, and stay connected to what’s most important to them.

We run our business in much the same way. Our employees come as they are and do what they love. Imagine the opportunities you’ll have in a company with 90,000 employees in more than 100 countries, working on hundreds of products—spanning games, phones, developer tools, business solutions and operating systems. We work hard, but we value work/life balance, and each of us defines what that means to us.

Sandia National Laboratories

Sandia National Laboratories is operated for the U.S. Department of Energy's National Nuclear Security Administration (NNSA). A strong science, technology, and engineering foundation enables Sandia's mission through a capable research staff working at the forefront of innovation, collaborative research with universities and companies. In keeping with our vision to be the nation's premier science and engineering laboratory for national security and technology innovation, we recruit the best and the brightest, equip them with world-class research tools and facilities, and provide opportunities to collaborate with technical experts from many different scientific disciplines.

http://www.sandia.gov
Savannah River Nuclear Solutions

SRS is a Department of Energy facility located near Aiken, S.C. The 310-square-mile complex borders the Savannah River between South Carolina and Georgia. SRS was constructed during the early 1950s to support our nation’s security. For 35 years, SRS produced the basic materials used to fabricate nuclear weapons. As the world changed, so did the site. SRS now supports current and future national security requirements by reducing the global nuclear nonproliferation danger, protecting and enhancing America’s energy independence, restoring the environment, and managing waste and nuclear materials. SRS scientists and engineers conduct research, develop technologies and implement practical solutions in support of ongoing missions at SRS.

Zachry Construction Corporation

Join a company with a remarkable past and a promising future.

Since our first project in 1924 – a $40,000 contract from the Texas Highway Department to construct four concrete reinforced bridges in Laredo, Zachry has completed more than 5,500 public and private sector projects across the country and around the world, including highways, bridges, dams, runways, commercial facilities, power generation plants, chemical refineries and industrial manufacturing plants. With a renewed focus on heavy and building construction and materials, Zachry is looking for the next generation of innovators to continue in the tradition of making the world a better place, one project and one community at a time.
